

**Assurance Statement related to
Water Inventory CY 2015 and FY 2015
Prepared for Gap, Inc.**

Terms of Engagement

This Assurance Statement has been prepared for Gap, Inc. (Gap).

Lloyd's Register Quality Assurance, Inc. (LRQA) was commissioned by Gap to assure its water consumption for the calendar year 2015 (hereafter referred to as "the Report").

The Report relates to water consumed by Gap's operations in the United States of America (US) for both calendar year 2015 (CY 2015) covering the period January 1, 2015 to December 31, 2015 and fiscal year 2015 (FY 2015) covering the period February 1, 2015 to January 31, 2016.

Management Responsibility

Gap's management was responsible for preparing the Report and for maintaining effective internal controls over the data and information disclosed. LRQA's responsibility was to carry out an assurance engagement on the Report in accordance with our contract with Gap.

Ultimately, the Report has been approved by, and remains the responsibility of Gap.

LRQA's Approach

Our assurance has been conducted using the principles of ISO 14064–3:2006 *Specification with guidance for validation and verification of greenhouse gas assertions* to provide limited assurance that water consumption data as presented in the Report have been prepared in conformance with the Gap Water Methodology and Assumptions and taking into consideration the World Resources Institute/World Business Council for Sustainable Development (WRI/WBCSD) Greenhouse Gas (GHG) Protocol, Revised edition.

To form our conclusions the assurance engagement was undertaken as a sampling exercise and included the following activities:

- Conducted site visit and phone interviews with the key personnel responsible for collecting, recording and reporting Gap's water consumption data;
- Reviewed Gap's systems for collecting, recording and reporting data;
- Reviewed data sources, including raw data, internal reports and calculation data; and
- Reviewed information and data presented by Gap in its final summary of their water consumption.

Level of Assurance and Materiality

The opinion expressed in this Assurance Statement has been formed on the basis of a limited level of assurance and at a materiality of the professional judgment of the verifier.

LRQA's Opinion

Based on LRQA's approach nothing has come to our attention that would cause us to believe that the total water consumption by Gap's operations in the US disclosed in the Report, as summarized in Table 1 below, are not materially correct and have not been prepared in conformance with the GAP Water Methodology and Assumptions and taking into consideration the WRI/WBCSD GHG Protocol, Revised edition.

LRQA's Independence

LRQA is the 3rd party assurance provider for Gap's GHG emissions inventory, energy consumption data and water consumption data. These assessments are the only work undertaken by LRQA for Gap and as such do not compromise our independence or impartiality.

Signed:

Dated: 26th May, 2016

Marisol Bacong,
Lead Verifier
On behalf of LRQA, Inc.
Houston, Texas
United States of America

Scope of Water Inventory	Quantity, m³
Calendar Year 2015	1,141,911
Fiscal Year 2015	1,117,010

This Assurance Statement is subject to the provisions of this legal section:

This Assurance Statement is only valid when published with the Report to which it refers. It may only be reproduced in its entirety.

Lloyd's Register Group Limited, its affiliates and subsidiaries, including LRQA, Inc., and their respective officers, employees or agents are, individually and collectively, referred to in this Legal Section as 'Lloyd's Register'. Lloyd's Register assumes no responsibility and shall not be liable to any person for any loss, damage or expense caused by reliance on the information or advice in this document or howsoever provided, unless that person has signed a contract with the relevant Lloyd's Register entity for the provision of this information or advice and in that case any responsibility or liability is exclusively on the terms and conditions set out in that contract.

Due to inherent limitations in any internal control, it is possible that fraud, error, or non-compliance with laws and regulations may occur and not be detected. Further, the verification was not designed to detect all weakness or errors in internal controls so far as they relate to the requirements set out above as the verification has not been performed continuously throughout the period and the verification carried out on the relevant internal controls were on a test basis. Any projection of the evaluation of control to future periods is subject to the risk that the processes may become inadequate because of changes in conditions, or that the degree of compliance with them may deteriorate.

The English version of this Assurance Statement is the only valid version. Lloyd's Register assumes no responsibility for versions translated into other languages. In the case of any conflict between the English and any other language versions of this Legal Section, the English version shall prevail.
